## PRIMARY CARE

Your primary care team knows you and your health history. Your team includes your primary care provider, a mental health clinician, a nurse and a medical case manager.

# PRIMARY CARE

Your primary care team can help with:

Aches/pains in joints, muscles, arms or legs

Chronic disease issues

Feeling anxious or depressed

Fever, chills, headache, body aches

Medication refills

Minor cuts, burns, rashes, bug bites/stings

Nausea, vomiting, diarrhea, constipation, mild abdominal pain

Pain or changes with urination

Services at home or to support your medical care

Sexual health or reproductive health needs

Sore throat, congestion, sinus pain, red, itchy eyes

Thoughts of suicide or harming someone else

# EMERGENCY CARE

Use the Emergency Room or call 911 for signs of serious risk or medical emergency:

Broken bones, bleeding

Choking, fainting, loss of consciousness

New problem moving or speaking

Overdose, poisoning

Severe cuts, burns, rashes, bite/sting reactions

Sudden chest pain/pressure, difficulty breathing, confusion

Weakness or facial drooping on one side of your body

Think you will attempt suicide or harm someone else

# CONTACT US

Medical advice and mental health crisis intervention are available 24 hours a day. During business hours, ask for a same day appointment.
